Department of Computer Science and Engineering, Birla Institute of Technology, Mesra, Ranchi, Jharkhand, India

Specialization: Engineering (Computer Science & Engineering)

Research Areas: Soft Computing, Data Mining, Pattern Recognition, and Machine Learning

Thesis Title: Classification Techniques and Rule based System for Diabetes.

Thesis Descriptions: Diabetes means blood sugar is above desired level on a sustained basis. We have collected the real data of diabetes patients and suffered from some other diseases people or normal people in the hospital who visited to doctor. For this collected real dataset and some existing datasets have used several classification techniques and also developed rule-based diagnosis system for diabetes as per the suggestions of Diabetologist.

CGPA obtained in course work: 8.25/10

M.Tech. (March 2013)

Department of Computer Science and Engineering, Oriental College of Technology, Bhopal, Madhya Pradesh, India

Specialization: Computer Science and Engineering

Research Areas: Database, and Web Security

Thesis Title: Loss Minimization of Web Databases by Fine Grain Approach.

Thesis Descriptions: The secured web database has been created at the application and database layer, minimized the loss of data in the database, and also recovered the lost data. When data has been altered by an unauthorized user, then authorized user is informed by SMS and Email by using fine grain access control.

CGPA obtained: 7.87/10 (78%)
